SUBJECT INDEX TO VOLUME 26 (1987)

Experimental oncology

Oncogenes for the oncologist 3
Effect of 5-fluorouracil on the cell growth and cell cycle kinetics of a mouse ascites tumor growing in vivo 125
Effects of portal blood flow and intra-arterially injected starch microspheres on the passage of a labelled tracer through the liver—An experimental study in pigs 217
An experimental model for pharmacokinetic studies of monoclonal antibodies in human colonic cancer 447
Enhanced uptake of intra-arterially injected anti-CEA monoclonal antibodies in human colonic cancer after mannitol infusion in an experimental model 453

Experimental radiobiology

Effects of testicular irradiation on stem cell survival, hormonal environment and spermatogenic cells in Wistar rats 57
Bone healing following irradiation during tourniquet ischaemia 63
Effects of irradiation with conventional and multiple daily fractionation on serum amylase activity . . . 139
Evaluation of blood levels of zinc protoporphyrin by radiomimetic drugs and Friend leukemia virus . . 223
Radioprotection of peripheral blood cells with a combination of hydroxytryptophan and a thiol compound in mice 229
Effects of microwaves on the colonyforming capacity of haemopoietic stem cells in mice 233
Modification of radiosensitivity of bone marrow lymphocytes by WR-2721 317
The effect of glycolysis inhibitors on the recovery of CHO-K1 cells from split-dose irradiation 367
Late radiation effects in the mouse brain—A quantitative study on PAS positive deposits 373
Tolerance of canine portal vein anastomosis to intraoperative X-irradiation 459
Bone cell viability after irradiation—An enzyme histochemical study 463
Local anaesthetics modifying the dermal response of irradiation—An experimental study 467
Circadian phenomena and irradiation—Modifications of enzyme activity in the small intestine after sublethal exposure 477
Inability of polyethylene-glycol substituted copper- and zinc-containing superoxide dismutase to protect mice against radiation lethality 483

Epidemiology and etiology

Radiation therapy of hemangiomas, 1909–1959—A cohort based on 50 years of clinical practice at Radiumhemmet, Stockholm 33
Occurrence and distribution of bone tumours in beagle dogs exposed to 90 Sr 133
Lung cancer in males and type of dwelling—An epidemiologic pilot study 211
The number of menstrual cycles prior to the first full term pregnancy—An important risk factor of breast cancer? 387

Pathology

Effects of roentgen irradiation on human melanoma metastases in the skin 37
Male breast carcinoma—I. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to clinical and histopathologic parameters 241
Modified histologic classification for carcinoma of the breast—Prognostic value and relation to effect of adjuvant oophorectomy 343
Paratesticular leiomyosarcoma—Report of two new cases and literature review 389

Clinical oncology

Diagnostics. Symptomatology

The role of lymphography in the staging and treatment of ovarian dysgerminoma—Report on 27 cases 23
Thyroid tissue characterization by proton magnetic resonance relaxation time determination 27
Relationship between certain radiographic and biologic characteristics in breast cancer 89
Clinical comparison of 11C-ACPC (aminocyclopentane carboxylic acid) and 13N-ammonia as tumour tracers 105
Bone marrow evaluation in small cell carcinoma of the lung 185
Growth rate of pulmonary metastases from soft tissue sarcoma 189
Male breast carcinoma—I. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to clinical and histopathologic parameters 241
Costs and benefits of breast cancer diagnosis 257
Food preferences, nutrient intake and nutritional status in cancer patients 301

SUBJECT INDEX TO VOLUME 26 (1987)

Experimental oncology

Oncogenes for the oncologist 3
Effect of 5-fluorouracil on the cell growth and cell cycle kinetics of a mouse ascites tumor growing in vivo 125
Effects of portal blood flow and intra-arterially injected starch microspheres on the passage of a labelled tracer through the liver—An experimental study in pigs 217

Effects of roentgen irradiation on human melanoma metastases in the skin 37
Male breast carcinoma—I. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to clinical and histopathologic parameters 241
Modified histologic classification for carcinoma of the breast—Prognostic value and relation to effect of adjuvant oophorectomy 343
Paratesticular leiomyosarcoma—Report of two new cases and literature review 389

Clinical oncology

Diagnostics. Symptomatology

The role of lymphography in the staging and treatment of ovarian dysgerminoma—Report on 27 cases 23
Thyroid tissue characterization by proton magnetic resonance relaxation time determination 27
Relationship between certain radiographic and biologic characteristics in breast cancer 89
Clinical comparison of 11C-ACPC (aminocyclopentane carboxylic acid) and 13N-ammonia as tumour tracers 105
Bone marrow evaluation in small cell carcinoma of the lung 185
Growth rate of pulmonary metastases from soft tissue sarcoma 189
Male breast carcinoma—I. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to clinical and histopathologic parameters 241
Costs and benefits of breast cancer diagnosis 257
Food preferences, nutrient intake and nutritional status in cancer patients 301

Prognostic factors. Tumour markers

Risk factors in stage III breast carcinoma 19
Estrogen receptor levels and survival of breast cancer patients—A study on patients participating in randomized trials of adjuvant therapy 95
Head and neck cancer—Reliability of American Joint Committee's staging system as prognostic indicator 173
Non-Hodgkin lymphoma—Multivariate analysis of prognostic factors including fraction of S-phase cells 179
Male breast carcinoma—I. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to clinical and histopathologic parameters 241
Tumor markers in mammary carcinoma—An evaluation of carcinoembryonic antigen, placental alkaline phosphatase, pseudouridine and CA-50 . . . 261
Carcinoma in situ of the vulva—Long term prognosis 277
Ewing's sarcoma—A retrospective study of prognostic factors and treatment results 281
Male breast carcinoma—II. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to treatment, prognostic factors and survival 327
Modified histologic classification for carcinoma of the breast—Prognostic value and relation to effect of adjuvant oophorectomy 343
Preoperative irradiation in oral cavity carcinoma—A study with special reference to DNA pattern, histologic response and prognosis 349

Surgery

Changing aspects in the treatment of squamous cell carcinoma of the oral tongue 163
Combined modality therapy for oesophageal squamous cell carcinoma 175
Carcinoma of the penis—A 12-year review 413
Male breast carcinoma—II. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to treatment, prognostic factors and survival 327

Radiotherapy. Clinical radiobiology

Bleomycin, methotrexate and vincristine before irradiation of stage III and IV laryngeal and pharyngeal squamous cell carcinoma—A study initiated by the Danish Society of Head and Neck Cancer 13
Radiation therapy of hemangiomas, 1909–1959—A cohort based on 50 years of clinical practice at Radiumhemmet, Stockholm 33
Effects of roentgen irradiation on human melanoma metastases in the skin 37
Radiation treatment of giant-cell tumour of bone (osteoclastoma) 41
DNA damage in clinical radiation therapy studied by microelectrophoresis in single tumour cells—A preliminary report 45
Does sucralfate reduce radiation-induced diarrhea? 76
A technical device for irradiation in carcinoma of the penis 77
Orgotein in radiation treatment of bladder cancer—A report on allergic reactions and lack of radioprotective effect 101
Changing aspects in the treatment of squamous cell carcinoma of the oral tongue 163
Combined modality therapy for oesophageal squamous cell carcinoma 175
Radiation pneumonitis and fibrosis following split-course radiation therapy for lung cancer—A radiologic and physiologic study 193
Incidence of infectious symptoms after radiation therapy for breast cancer—Long-term effects . . 197
Radiation therapy of intrathoracic paraaortic lymph node metastases—Three-dimensional treatment planning 203
Treatment of malignant head and neck tumors during pregnancy—A report of 3 cases 237
Tolerance of radiotherapy combined with adjuvant chemotherapy in breast cancer 269
An accurate method of 192 Ir wire implantation for locally advanced carcinoma of breast 273
Colour visualization as an aid to the comparison of treatment plans for prostatic carcinoma 313
Male breast carcinoma—II. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to treatment, prognostic factors and survival 327
Preoperative irradiation in oral cavity carcinoma—A study with special reference to DNA pattern, histologic response and prognosis 349
Carcinoma of the penis—A 12-year review 413
Early results of radiotherapy for advanced laryngeal cancer using three small fractions per day 437
Radiation treatment with twice a day fractionation versus conventional fractionation in high grade astrocytoma—A retrospective study 441
A technique using electrons and photons in the radiotherapy of orbital neoplasms 492

Radiation injury

Cytogenetic effects of cardioangiography on blood lymphocytes in children and in vitro effects of contrast medium and low dose radiation 69
Does sucralfate reduce radiation-induced diarrhea? 76
Radiation pneumonitis and fibrosis following split-course radiation therapy for lung cancer—A radiologic and physiologic study 193

Incidence of infectious symptoms after radiation therapy for breast cancer—Long-term effects . . 197
Estimation of long-term salivary gland damage induced by radiotherapy 307
Chylous ascites following pelvic irradiation 491

Chemotherapy and hormonal therapy

Bleomycin, methotrexate and vincristine before irradiation of stage III and IV laryngeal and pharyngeal squamous cell carcinoma—A study initiated by the Danish Society of Head and Neck Cancer 13
Chemotherapy in advanced breast cancer 81
Combined modality therapy for oesophageal squamous cell carcinoma 175
Tolerance of radiotherapy combined with adjuvant chemotherapy in breast cancer 269
Sequential 5-flourouracil and methotrexate—Negative experience in metastatic colorectal cancer . . 289
Intra-arterial mitomycin C treatment of unresectable liver tumours—Preliminary results on the effect of degradable starch microspheres 295
Male breast carcinoma—II. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to treatment, prognostic factors and survival 327
Modified histologic classification for carcinoma of the breast—Prognostic value and relation to effect of adjuvant oophorectomy 343
Cisplatin as second line chemotherapy in advanced or recurrent squamous cell carcinoma of head and neck region 357
Effect of starch microspheres on the passage of labelled erythrocytes and a low molecular weight marker through the liver 361
Cytotoxic treatment in patients with malignant carcinoid tumors—Response to streptozocin—alone or in combination with 5-FU 429
Oral Ftorafur versus intravenous 5-fluorouracil—A comparative study in patients with colorectal cancer 433

Miscellaneous subjects

To meet spiritual needs of the cancer patient—A responsibility for the oncologist? 75
The Education Branch of EORTC and its new publication 'Reviews in Oncology'—A presentation . . 325
Psycho-endocrinological reactions in female relatives of cancer patients—Effects of an activation programme 419
Problems associated with comparisons of response-defined subsets of patients in randomized trials—Treatment-related bias and response migration . . 425

Tumours

Digestive system

Bleomycin, methotrexate and vincristine before irradiation of stage III and IV laryngeal and pharyngeal squamous cell carcinoma—A study initiated by the Danish Society of Head and Neck Cancer 13
Head and neck cancer—Reliability of American Joint Committee's staging system as prognostic indicator 173
Combined modality therapy for oesophageal squamous cell carcinoma 175
Treatment of malignant head and neck tumours during pregnancy—A report of 3 cases 237
Sequential 5-flourouracil and methotrexate—Negative experience in metastatic colorectal cancer . . 289
Intra-arterial mitomycin C treatment of unresectable liver tumours—Preliminary results on the effect of degradable starch microspheres 295
Oral Ftorafur versus intravenous 5-fluorouracil—A comparative study in patients with colorectal cancer 433
Preoperative irradiation in oral cavity carcinoma—A study with special reference to DNA pattern, histologic response and prognosis 349
Cisplatin as second line chemotherapy in advanced or recurrent squamous cell carcinoma of head and neck region 357
Effect of starch microspheres on the passage of labelled erythrocytes and a low molecular weight marker through the liver 361
An experimental model for pharmacokinetic studies of monoclonal antibodies in human colonic cancer 447
Enchanced uptake of intra-arterially injected anti-CEA monoclonal antibodies in human cancer after mannitol infusion in an experimental model . . . 453

Respiratory system

Bleomycin, methotrexate and vincristine before irradiation of stage III and IV laryngeal and pharyngeal squamous cell carcinoma—A study initiated by the Danish Society of Head and Neck Cancer 13
Changing aspects in the treatment of squamous cell carcinoma of the oral tongue 163
Head and neck cancer—Reliability of American Joint Committee's staging system as prognostic indicator 173
Bone marrow evaluation in small cell carcinoma of the lung 185
Radiation pneumonitis and fibrosis following split-course radiation therapy for lung cancer—A radiologic and physiologic study 193
Lung cancer in males and type of dwelling—An epidemiologic pilot study 211
Cisplatin as second line chemotherapy in advanced

or recurrent squamous cell carcinoma of head and neck region 357
Early results of radiotherapy for advanced laryngeal cancer using three small fractions per day 437

Skin

Radiation therapy of hemangiomas, 1909–1959—A cohort based on 50 years of clinical practice at Radiumhemmet, Stockholm 33
Effects of roentgen irradiation on human melanoma metastases in the skin 37

Breast

Risk factors in stage III breast carcinoma 19
Chemotherapy in advanced breast cancer 81
Relationship between certain radiographic and biologic characteristics in breast cancer 89
Estrogen receptor levels and survival of breast cancer patients—A study on patients participating in randomized trials of adjuvant therapy 95
Incidence of infectious symptoms after radiation therapy for breast cancer—Long-term effects . . 197
Costs and benefits of breast cancer diagnosis 257
Tumor markers in mammary carcinoma—An evaluation of carcinoembryonic antigen, placental alkaline phosphatase, pseudouridine and CA-50 . . . 261
Tolerance of radiotherapy combined with adjuvant chemotherapy in breast cancer 269
An accurate method of 192 Ir wire implantation for locally advanced carcinoma of breast 273
Male breast carcinoma—II. A study of the total material reported to the Swedish Cancer Registry 1958–1967 with respect to treatment, prognostic factors and survival 327
Modified histologic classification for carcinoma of the breast—Prognostic value and relation to effect of adjuvant oophorectomy 343
The number of menstrual cycles prior to the first full term pregnancy—An important risk factor of breast cancer? 387

Kidney and urinary tract

Orgotein in radiation treatment of bladder cancer—A report on allergic reactions and lack of radioprotective effect 101

Female genital organs

The role of lymphography in the staging and treatment of ovarian dysgerminoma—Report on 27 cases 23
Carcinoma in situ of the vulva—Long term prognosis 277
Chylous ascites following pelvic irradiation 491

Male genital organs

A technical device for irradiation in carcinoma of the penis 77
Colour visualization as an aid to the comparison of treatment plans for prostatic carcinoma 313
Paratesticular leiomyosarcoma—Report of two new cases and literature review 389
Carcinoma of the penis—A 12-year review 413

Endocrine organs

Thyroid tissue characterization by proton magnetic resonance relaxation time determination 27

Nervous system and sense organs

Radiation treatment with twice a day fractionation versus conventional fractionation in high grade astrocytoma—A retrospective study 441
A technique using electrons and photons in the radiotherapy of orbital neoplasms 492

Haemopoietic, lymphatic and reticuloendothelial systems

Non-Hodgkin lymphoma—Multivariate analysis of prognostic factors including fraction of S-phase cells 179

Bone and soft tissue

Radiation treatment of giant-cell tumour of bone (osteoclastoma) 41
Growth rate of pulmonary metastases from soft tissue sarcoma 189
Ewing's sarcoma—A retrospective study of prognostic factors and treatment results 281

Miscellaneous tumours

Cytotoxic treatment in patients with malignant carcinoid tumors—Response to streptozocin—alone or in combination with 5-FU 429

Radiation Physics

Technical devices

A technical device for irradiation in carcinoma of the penis 77
Equipment for radiation surgery using narrow 185 MeV proton beams—Dosimetry and design 143
Design principles and clinical possibilities with a new generation of radiation therapy equipment 403

Dosimetry

Calculation and application of point spread functions for treatment planning with high energy photon beams 49
Equipment for radiation surgery using narrow 185 MeV proton beams—Dosimetry and design 143
Radiation therapy of intrathoracic paraaortic lymph node metastases—Three-dimensional treatment planning 203
Colour visualization as an aid to the comparison of treatment plans for prostatic carcinoma 313
Optimal dose distribution for eradication of heterogeneous tumors 377
A technique using electrons and photos in the radiotherapy of orbital neoplasms 492

Radiation protection

Radiation exposure to personnel in departments of gynaecologic oncology in Sweden 113
Radioactive iodine and cesium in travellers to different parts of Europe after the Chernobyl accident 207
